

# **FISCAL NOTE**

## **SJR 60**

February 19, 2003

**SUMMARY OF BILL:** Urges the U.S. Department of Energy to require its employees and contractors who are engineers working at DOE facilities in Tennessee to comply with Tennessee's registration law for engineers, codified at TCA, Title 62, Chapter 2, Parts 1 through 4. The resolution requests the United States Congress to introduce legislation requiring employees and contractors of the U.S. Department of Energy who are engineers to be licensed in the state in which they are working.

### **ESTIMATED FISCAL IMPACT:**

#### **Increase State Expenditures - Not Significant**

The fiscal impact of the resolution, in and of itself, is estimated to be minimal, since adoption of the resolution does not mandate the licensure of such engineers in Tennessee and would take action by the United States Congress. Any printing expenses to transmit the resolution to various parties is estimated to be not significant.

For information purposes, it should be noted that should such engineers be licensed in Tennessee, there will be some expenditures and revenues to the state from such licensure by the Board of Architects and Engineers in the Department of Commerce and Insurance.

### **CERTIFICATION:**

This is to duly certify that the information contained herein is true and correct to the best of my knowledge.
